Education

University of Calgary

Bachelor of Science — Major in Data Science — Concentration in Economics

Expected Graduation: May 2029

Calgary, AB

Technical Skills

Languages: Python, Java, SQL, C#, JavaScript

Libraries/Frameworks: Pandas, NumPy, FastAPI, Pydantic, OpenCV, MediaPipe

Tools: Git, GitHub, VS Code, REST APIs, JSON, Data Pipelines, cron, Linux/Bash, Ollama

Projects

AI Trading Pipeline | github.com/AayanAhmed040/AI-Trading-Pipeline

Sep 2026

- Built a fault-tolerant **data pipeline** using an **Ubuntu** server and **cron** scheduling, pulling intradaily financial bars and computing RSI, MACD, and ATR.
- Developed a local inference service using **FastAPI**, integrated with **Pydantic** schemas to validate and securely parse **LLM** outputs from a separate node into structured market signals.
- Engineered an evaluation pipeline to shadow-log every execution, benchmarking the LLM-generated signals against a technical baseline to quantify model edge and confidence calibration.

Telegram-to-Discord Data Pipeline | github.com/AayanAhmed040/Telegram-Discord-Forwarder

Feb 2025

- Engineered a cross-platform event pipeline in **Python** to scrape and forward messages from Telegram to Discord.
- Implemented asynchronous handling with **Telethon** to manage high-volume data streams without blocking.
- Designed a **JSON**-based configuration system to manage webhooks and channel mapping for scalability.

Work Experience

Youth Program Teaching Assistant & Instructor

Jun 2026 – Aug 2026

Circuit Stream (MRU Camps & STS Camps)

Calgary, AB

- Stepped up as Lead Instructor for 2 weeks at STS Camps, owning classroom management and game dev instruction.
- Taught hands-on Python-based **AI engineering**, guiding students through programming fundamentals.
- Mentored youth in 2D & 3D **game development** and environmental design in **Unity** and **Unreal Engine**, troubleshooting code and project architecture across multiple development environments to foster problem-solving.
- Made complex software concepts accessible to pre-university students, driving high engagement and project deployments.

Facilitator

Jan 2024 – May 2025

Steamoji

Calgary, AB

- Instructed students (ages 5–14) in core programming concepts, including **Python** and Scratch.
- Mentored students across STEM disciplines, including 3D modelling and engineering, adapting to diverse learning levels.

Freelance Python Developer

Feb 2022 – Jun 2023

Self-Employed

Calgary, AB

- Developed, deployed, and sold custom **Discord bots** to multiple clients.
- Engineered user activity tracking systems and economy modules (**JSON** storage) to drive community engagement.
- Automated key community management tasks, replacing manual client work and moderation.

Achievements

MRU INBU Hackathon

Apr 2026

Second Place

Calgary, AB

- Developed *Terrascope*, an AI market intelligence platform predicting market entry viability for AdvancedUAV Tech.
- Directed a 5-person team with AdvancedUAV executives over a 6-week capstone to deliver a market entry predictor.

MRU Social Innovation Showcase

Dec 2025

#1 Best Overall Project

Calgary, AB

- Architected *Reharvest Alberta*, a business framework and technology proposal to reduce provincial food waste.
- Collaborated in a 5-person team from academic ideation to a competitive showcase presentation, securing the top award.
